Justification (Why is this position needed?)

To support our rapid expansion into multi-cloud enterprise deployments for key telecom and banking clients, we require a dedicated Senior Cloud Infrastructure Engineer. This role is critical to design, deploy, and maintain our high-availability microservices architecture, implement automated CI/CD pipelines, and ensure 99.99% uptime for core enterprise services.

Position Requirements (refer to JD attached)

- Bachelor's or Master's degree in Computer Science, Software Engineering, or related technical field.
- Minimum 5+ years of production experience in AWS/GCP and Kubernetes orchestration.
- Strong proficiency in Terraform, Ansible, Docker, and Linux kernel administration.
- Proven track record with PostgreSQL replication, Redis clusters, and Prometheus/Grafana monitoring.
- Industry certifications: AWS Certified Solutions Architect (Professional) or CKA preferred.
- Excellent cross-functional technical communication and mentoring abilities.

(Job Description attached:)
