## Justification (Why is this position needed?)

Install & Configuration Server & Storage, Support Service operation.
Due to increasing operational workload and expanding enterprise infrastructure deployments, the Technical Department requires an additional dedicated System Specialist to handle server installations, storage configurations, virtualization administration, and provide ongoing Level 1/2 service support to maintain SLA commitments.

## Position Requirements (refer to JD attached)

Roles & Responsibilities:
- Installing, configuring, managing and troubleshooting Server and Storage (Virtualized and Hardware).
- Systems administration and monitoring infrastructure.
- Participate in the design of information and operational support systems.
- Evaluate and apply necessary operating system security patches, hotfixes, service packs and hardware updates.
- Provide Level 1 support, and escalate to Level 2 when needed.

Job Requirements:
- Bachelor's degree or 4th year student in Computer Science or related IT discipline.
- Basic knowledge of server hardware and networking.
- Experience working with VMware vSphere, vCenter.
- Understanding of basic Active Directory and DNS concepts with Windows Server 2016/2022 operating systems.
- Experience in installing, configuring and troubleshooting UNIX / Linux based environments.
- Good team player, willing to share knowledge with the team, good written and verbal communication skills.
- Ability to work reliably under pressure.
