## Justification (Why is this position needed?)

Install & Configuration Server & Storage, Support Service operation. The Technical Department requires dedicated infrastructure systems expertise to ensure high availability, enterprise virtualization administration (VMware vSphere/vCenter), Windows Server / Active Directory governance, and

proactive Linux systems maintenance and security patch management.

**Position Requirements (refer to JD attached)**

[Roles & Responsibilities]
• Installing, configuring, managing and troubleshooting Server and Storage (Virtualized and Hardware).
• Systems administration and monitoring infrastructure.
• Participate in the design of information and operational support systems.
• Evaluate and apply necessary operating system security patches, hotfixes, service packs, and hardware updates.
• Provide level 1 support, and escalate to level 2 if needed.

[Qualifications & Requirements]
• Bachelor's degree or 4th-year student in Computer Science.
• Basic knowledge of server hardware and networking.
• Hands-on experience working with VMware vSphere and vCenter.
• Clear understanding of Active Directory and DNS concepts with Windows Server 2016/2022.
• Practical experience in installing, configuring, and troubleshooting UNIX/Linux environments.
• Good team player with strong communication skills and ability to work under pressure.
